

Aarau, Hamburg, Palo Alto, Jan. 6, 2012:

Reycom's REC100 hybrid settop boxes available in ATSC, DVB-S and -T versions!

Built on the Windows Embedded Standard 7 platform and powered by Intel® and Nvidia® graphic processors Reycom's REC100 provides an unbelievable TV experience with DLNA multi-room and extender capabilities. Following the launch of the REC100 version for cable operator customers (DVB-C) earlier in 2011, Amazon has started to distribute the REC100 Sat version (REC100 –S2) end of 2011 in Germany. In parallel Reycom has started to sell the REC100 version for terrestrial reception (REC100-T2) overseas. Now, the ATSC-version for the US is available Via LeoNovus (TSXV: LTV), a leading developer of an integrated high performance browser-based HDTV Internet software platform. LeoNovus offers for sale the Reycom Entertainment Center (The REC 100-ATSC) bundled with the LeoNovusTV Service.

[The REC 100-ATSC](#) is equipped with live TV in HD, time-shift abilities, and dual access to the Internet for a wide range of films and TV shows via video on demand (VoD), gaming, movies, Internet TV, music and Apps. Consumers are able to store virtually all of their entertainment choices, and play them within the built-in hard disk and DVD player. In addition, the REC's extensive multi-room features allows streaming of videos, music, pictures, and more, between the REC and the user's PCs, home server and/or Windows Phone 7® including Xbox 360® as an extender. The REC's functionalities can be either controlled by the supplied REC RF remote control or via Windows Phone7 and/or Apple iPhone.

The REC100 available in four versions (ATSC, DVB-C / DVB-S2 / DVB-T2).

About Reycom: (<http://www.reycom.ch/us>)

Reycom is an entertainment company developing solutions ranging from end-user devices containing TV tuners with encoding/encryption technologies, IPTV or OTT to new software services such as e-commerce offerings accessible from your TV.

Reycom is under the control and management of its founder and CEO Pascal Rey. The company operates competence centers in Switzerland (Aarau) and Germany (Hamburg) employing hardware and software engineers with multi-annual track records in design and production of high-end media centers and classical set top boxes.

Reycom operates in close cooperation with leading technology partners such as Intel®, Microsoft® and Nvidia®.

About LeoNovus Inc. (www.LeoNovus.com)

LeoNovus is developing a high performance browser-based Internet platform with a managed system approach that will provide HDTVs and other consumer electronic devices with access to all the features, content, and functionality available on the Web without the malware, security and support issues of a PC. LeoNovus seeks to change the way high-value Internet content is organized, monetized, and delivered on HDTVs, providing a true consumer electronics experience to the largest monitor in the house.

LeoNovus shares have traded on the TSX Venture Exchange since June 10, 2009. Further information about LeoNovus can be found in its filings with Canadian securities regulators, which filings are available at www.sedar.com.
